

# AusVaxSafety's ACTIVE follow-up after your vaccination

## What is AusVaxSafety?

AusVaxSafety is a national system for monitoring vaccine safety in Australia. The system is led by the National Centre for Immunisation Research and Surveillance (NCIRS). It is funded by the Australian Government Department of Health.

## AusVaxSafety monitoring safety of vaccines used in Australia

In partnership with Australian state and territory health departments, GPs, Aboriginal Community Controlled Health Organisations and pharmacies, AusVaxSafety is following up people who receive a vaccine in participating immunisation sites by sending them an SMS or email with a short survey that asks if they experienced any adverse event following vaccination.

## How does it work?

### Day 0

You receive a vaccine at a participating immunisation clinic

### Day 3

You will get the first survey about your vaccination

### Day 8

You will get the second survey about your vaccination (if you received a COVID-19 vaccine)

### 6 weeks

after your COVID-19 vaccine you will get your final survey

These surveys give you the opportunity to report any adverse events you have after receiving a vaccine. Depending on your survey responses, your state/territory health department or immunisation provider may call you to collect more details.

**Australian Government**

**Department of Health**

## What happens to the information you provide?

Survey responses will contribute to the national COVID-19 vaccine safety surveillance that AusVaxSafety is conducting.

## What about your personal data?

AusVaxSafety only receives responses that are 'de-identified' to protect your privacy. This means any information that could identify you or your child will be removed.

*Thank You!*

Thank you for your contribution to the ongoing monitoring of COVID-19 vaccine safety in Australia.
